

HELP SAVE THE ALCO S4

- Built in 1953
- Only 662 made
- Located 7 miles southeast of Pittsburg

Can we count on you for help?

The Alco S4 engine is due to be scraped...but we want to save it!

This engine, which is located in Missouri, cannot be moved by rail, so it must be trucked to its new location, which we hope will be Abilene. This engine will be given to the Abilene and Smoky Valley Railroad if we are able to move it. This engine would be a backup for the present diesel engine.

To move this engine will require a special built trailer to haul this 230,000-pound load. This is where your help comes in. We are needing to raise approximately \$6,000 to supplement what we have to build this trailer, along with other expenses of moving the engine.

If interested in helping, please mail donations to the Abilene and Smoky Valley Railroad, PO Box 744, Abilene, KS 67410. If questions, contact 785-263-1077.
